FLAGSHIP PROJECTS

Idle Cyber

Technical Leader | Idle Tower Defense / GameFi | iOS, Android, WebGL

Funded idle defense title combining progression, tower-defense combat, monetization, and early NFT flows.

- Led gameplay delivery for stages, upgrades, rewards, ads, and wallet / NFT marketplace prototype work.
 - Supported a product that successfully raised million-dollar funding.
 - Delivered cross-platform scope across mobile and WebGL.
-

Nekoverse

Senior Unity Developer | Play-to-Earn MMORPG / GameFi | Mobile, Web3

Blockchain MMORPG with real-time combat, resource farming, crafting, NFT assets, and staking mechanics.

- Built PvE / PvP gameplay systems, elemental interactions, and economy-linked RPG loops.
 - Integrated blockchain-facing gameplay concepts while keeping the core RPG loop usable.
 - Contributed to a product that successfully raised million-dollar funding.
-

MU: Loren Mobile

Senior Unity Developer | Licensed Mobile MMORPG | Android, iOS

Mobile MMORPG production work adapting classic MU-style progression and combat systems.

- Developed quest systems, class mechanics, monster spawning, events, battle flows, and UI features.
 - Worked on 3D mobile performance profiling and feature delivery inside a production pipeline.
 - Supported a feature set spanning classes, PvE / PvP, events, and gear progression.
-

Dalgona - Worldchain

Solo Developer | Web3 Mini-game | World App

Compact WebGL mini-game built end-to-end for the World App ecosystem.

- Owned mechanics, difficulty, UI / UX, leaderboard, publishing, and updates.
 - Reached Top 1 World App game ranking during launch period.
-

ProxyAPI.MAD

Founder / Solo Developer | Developer Tool / AI Infrastructure | Web

Agentic tooling project for multi-provider AI proxying and automation support.

- Built dashboard, API key management, provider routing, chat UI, logs, and extensible agent architecture.
 - Represents current work in agentic systems, internal tools, and automation pipelines.
-
