

Tran Van Hoa

Senior Unity Game Developer / Technical Leader

Ha Noi, Vietnam (UTC+7) hoatv.mad@gmail.com +84 374 639 758 github.com/hoatv2211 linkedin.com/in/hoatv

PROFILE

Senior Unity developer with 8+ years building mobile, WebGL, GameFi, MMORPG, casual, multiplayer, Telegram, and automation products. Strongest in end-to-end delivery: gameplay architecture, UI flows, SDKs, monetization, performance work, release support, and technical leadership.

TECHNICAL STRENGTHS

- Gameplay systems: idle loops, combat, quests, classes, monsters, events, progression, rewards.
- Platforms: Android, iOS, WebGL, Telegram Mini App, World App.
- GameFi: NFT assets, wallets, marketplace prototype, staking, crafting, DAO economy concepts.
- Production: analytics, ads, IAP, CI/CD, store publishing, debugging, profiling, live support.
- Automation: agentic systems, n8n, Telegram bots, proxy APIs, dashboards, internal tools.

EXPERIENCE

Lead Developer / Freelancer - Remote

Jan 2025 - Present

- Deliver Unity work across casual, mid-core, GameFi, and Web3 products for global clients.
- Lead distributed teams of 5-10 people, technical planning, mentoring, and release readiness.
- Build automation workflows, internal tools, proxy APIs, and agentic systems.

Senior Unity Developer - Gamota / Gabros Team

Jul 2023 - Jun 2024

- Shipped casual and idle titles including Sandwich Please, DOP, DIY, and puzzle games.
- Owned gameplay, UI, SDK / analytics integration, optimization, monitoring, and team support.

Project Manager / Senior Unity Developer - Neko Global

Jul 2022 - May 2023

- Built Nekoverse systems spanning PvE / PvP combat, NFT assets, staking, crafting, and profiling.
- Contributed to a GameFi MMORPG that successfully raised million-dollar funding.

SELECTED RESULTS

- 50+ published games across App Store, Google Play, and WebGL.
- Technical Leader for Idle Cyber, a million-dollar funded idle defense / GameFi title.
- Nekoverse GameFi systems for a product that raised million-dollar funding.
- MU: Loren Mobile systems: quests, classes, monsters, events, and mobile 3D optimization.
- Top 1 World App ranking for Dalgona during launch period.

STACK

- Unity, C#, C++, Lua
- Firebase, Supabase, AWS, Docker
- WebGL, mobile optimization, analytics
- MetaMask, NFT, GameFi, wallet integration
- n8n, Telegram Bot API, agentic tooling

FLAGSHIP PROJECTS

Idle Cyber

Technical Leader. Idle tower defense / GameFi, cross-platform release, ads, wallet flow, NFT marketplace prototype.

Nekoverse

Senior Unity Developer. Real-time RPG combat, resource economy, staking, crafting, blockchain gameplay integration.

MU: Loren Mobile

Senior Unity Developer. Licensed MMORPG production systems and mobile 3D profiling.

EARLIER LEADERSHIP

Project Manager / Technical Leader - BLAMEO Technology

Jun 2021 - May 2022

- Built the game team from the ground up and set delivery habits, ownership, and technical standards.
- Helped move the studio from casual titles toward more demanding mid-core production.
- Led Age of Sail multiplayer work with network-aware feature design and team coordination.

Unity Developer / Technical Leader on Idle Cyber - BEEMOB Studio

Mar 2021 - Jun 2021

- Led idle progression, tower-defense combat, rewards, ads, and NFT prototype flows.
- Delivered iOS, Android, and WebGL scope for a product that raised million-dollar funding.

Technical Leader - Techies Studio

Nov 2019 - Jun 2020

- Combined hands-on Unity development with task assignment, mentoring, and system design.

Unity Developer - 2NF Office Solutions / CSCMobi Studio

2017 - 2019

- Built early production experience across gameplay features, maintenance, deployment, and R&D.

PROJECT DEPTH

Dalgona - Worldchain

Solo-developed World App mini-game. Outcome: Top 1 game ranking during launch period.

ProxyAPI.MAD

Founder / solo developer. Multi-provider AI proxy with dashboard, chat UI, logs, keys, and future agent support.

Sandwich Please

Casual idle simulation title with gameplay systems, UX work, analytics, and mobile performance support.

EDUCATION

University of Transport and Communications - Bachelor's Degree in Information Technology
ITPlus Academy - Advanced Game Development & Unity Certification

WORKING STYLE

- Comfortable owning projects from playable prototype to release and post-launch support.
- Strong fit for teams needing both senior implementation and product-minded technical leadership.
- Experienced in aligning design, QA, backend, blockchain, and publishing constraints.
